Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

The examiner has not yet received the terminal disclaimer for application number ([10964229]) and thus a provisional obviousness-type double patent rejection is set forth below.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1,16,48,54,66 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,13 of copending Application No. Devantier (229).

This is a provisional obviousness-type double patenting rejection.

Regard claim 1, While, Devantier(229) of the instant application disclose of every claim feature, But, Devantier (229) failed to disclose of the determining at least one potential number of speakers and selecting the number of speakers based on statistical analysis. But, official notice is taken the concept of determining at least one potential number of speakers and selecting the number of speakers based on analysis is commonly known in the art. Thus , it would have been obvious for one of the ordinary skill in the art to have modify Devantier (229) with determining at least one potential number of speakers and selecting the number of speakers based on analysis for purpose of creating improve acoustic signal dependent on the environmental characteristic.

Similarly, Re claims 16,48,54,66 have been analyzed and rejected with respect to claim 1 above.

Allowable Subject Matter

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with.

3. Claims 1-50, 54-69 contain allowable subject matters but would only be allowed if applicant overcomes the provisional obviousness type double patent rejections.

RE claim 1, neither of the prior art of record disclose of the specific determining the potential number of speakers and wherein the statistically analyzing across at least one frequency of the predicted transfer functions for the plurality of listening positions; and selecting the number of speakers based on the statistical analysis.

Re claims 16, 48, 54, 66 contain similar allowable subject matter as recited in claim 1.
